

Covid Update

May 19, 2022

Residents, Families and Friends

While we have had cases of Covid resolved within our facility, we currently do have 2 cases of active covid.

Public Health continues to keep our facility in outbreak. Meals will continue to be delivered to your suite, and group activities will continue to be on hold at this time. It is strongly encouraged that residents only go out for essential outings such as medical appointments or groceries.

Residents, PLEASE wear a mask when you are not in your suite and socially distance. We have rearranged some furniture in the lobby areas to ensure 6ft separation between people.

Your mask must be **over your nose** and under your chin for full protection and to help prevent the spread of covid.

Anyone who has been in close contact with a someone who has tested positive for covid, with no mask on, is considered a high-risk contact.

For precautionary measures and to try to eliminate the spread of covid, those identified as high-risk contacts do have to isolate for a minimum of 5 days at which time further testing will be completed.

Many covid cases do not show any signs of infection, so please protect yourself and others by wearing your mask.

Residents who are not a high-risk contact or positive case can continue to come out of their suite. When in the lobby, bar lounge, courtyard or outside, residents must continue to practice all safety precautions. Please keep your mask on unless you are safely distanced of at least 6ft.

Dana Dudley Director of Care
